

Foundation Information

Foundation size and cost is determined by the size of the monument/headstone. The following examples show where to measure to determine the greatest point of length for a monument/headstone:

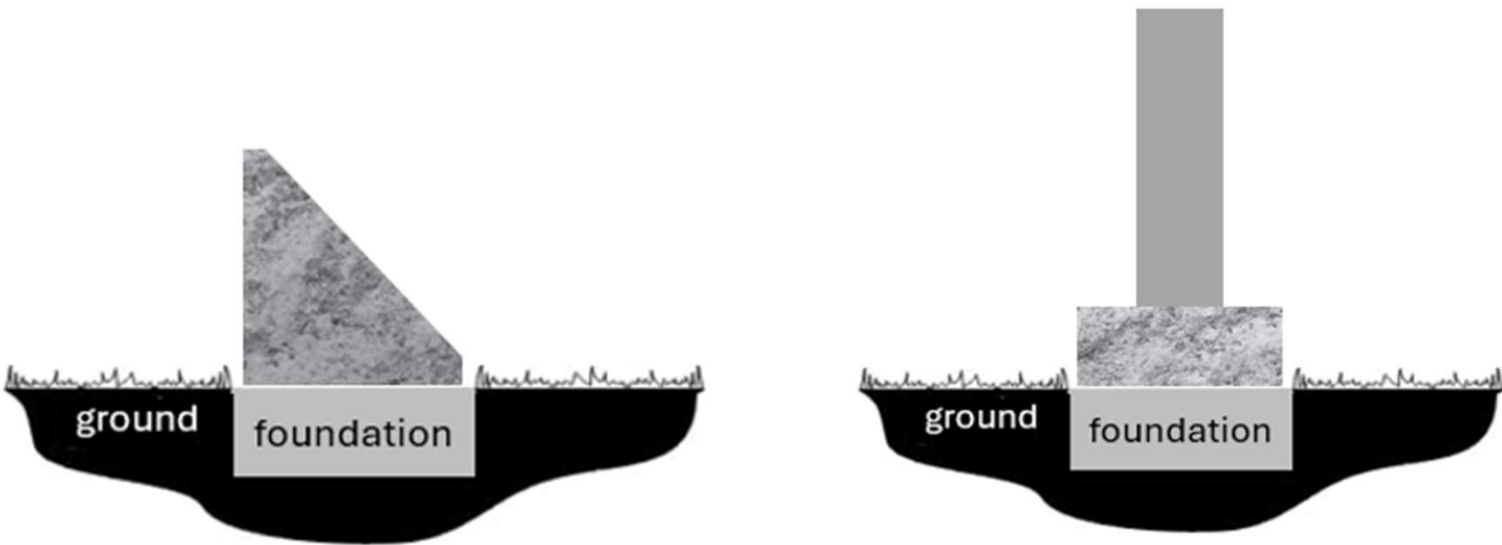

Lawn Level (flush in ground -no concrete)	Length x \$5
Height 48" and less	Length x \$10
Monuments with an overall height greater than 48" will require a foundation with additional depth to ensure stability.	
Height 49" to 60"	Length x \$15
Height 61" plus	Length x \$20
